

Appendix

A. Supporting Documents

Data Privacy Act of 2012 (Republic Act No. 10173) - The HRIS processes sensitive employee data such as names, contact information, addresses, employment history, and government IDs (SSS, PhilHealth). Compliance ensures protection of employee privacy and proper data handling practices.

Reference: <https://privacy.gov.ph/data-privacy-act/>

CHED Memorandum Orders (CMOs) - Ensures compliance with higher education record-keeping and reporting standards.

Reference: <https://www.ched.gov.ph/>

E-Commerce Act of 2000 (Republic Act No. 8792) - Governs electronic records, digital communications, system notifications, and online transactions within the HRIS.

Reference: <https://www.bsp.gov.ph/PaymentAndSettlement/RA8792.pdf>

Cybercrime Prevention Act of 2012 (Republic Act No. 10175) - Protects against hacking, unauthorized access, data theft, and system compromise.

Reference: <https://www.coe.int/en/web/octopus/country-wiki-ap>

Institutional IT Security Policies (RCC – ITS Department) - Ensures alignment with RCC's internal IT governance and security framework.

Reference: Internal RCC – Information Technology Services Department Policy Documentation

Anti-Money Laundering Act of 2001 (Republic Act No. 9160) - Supports verification and integrity of employee records related to payroll coordination.

Reference: <https://www.amlc.gov.ph/>

B. Tools and Technologies:

Programming Languages: HTML, CSS, JavaScript (React.js for Frontend, Node.js for Backend)

Database Management System: MySQL

Web Server: Apache(XAMPP)

Security Mechanisms: HTTPS (SSL/TLS), AES Encryption, Role-Based Access Control (RBAC), Secure Authentication

Operating System Compatibility: Windows Server or Linux Server

C. Assumptions and Constraints

The HRIS will operate as a web-based system within RCC's network infrastructure.

RCC will provide the necessary servers, hardware, and internet connectivity.

System availability depends on server uptime and network stability.

File uploads are limited to supported formats (PDF, JPG, DOC/DOCX) with a maximum of 15MB.

Features outside the defined scope (e.g., payroll, biometric integration,

advanced AI analytics) are excluded from the current version.

D. Future Enhancements

The current version of the HRIS is limited to the approved core modules: Employee Records, Attendance, Leave Management, Performance Evaluation, Applicant Tracking System (ATS), Wellness, and Reports.

The following features are **not included in the present project scope**, but may be considered for future development or system upgrades:

Mobile application support for HRIS access
Advanced analytics and AI-based workforce insights
Multi-level approval workflows
Biometric attendance integration
Payroll and external system integration
